

HV- AND INSULATION TRANSFORMERS

Series HVT / HVTT

The **PowerSources GmbH** in Meerbusch/Germany has been producing transformers and power supplies of any kind and power since 1948. The company has specialized in manufacturing high voltage transformers and power supplies. Transformer designs are available as air insulated versions up to 15kV and 30 kVA power or in cast resin vacuum technology up to 200kV and 30kVA output power. All transformers are manufactured to individual customer specifications, single or three phase. Either high voltage output or insulation transformers can be provided.

The dimensions are a function of the output voltage, power and insulation required. Individual calculation is required to determine the customer specific configuration. Please send us the filled questionnaire to allow us to quote for your requirement.

Typical Outline and Dimensions

- ☐ Low and Medium Power
- ☐ Ultra compact designs
- ☐ Dry Type
- ☐ Cast Resin technology
- ☐ Up to 200kV
- ☐ 1~ up to 10kVA
- ☐ 3~ up to 30kVA
- ☐ Single and three phase
- ☐ 2.5Hz up to 100kHz
- ☐ Customer specific designs

Size	Phase	Dimensions		
		A / mm	B / mm	C / mm
SBK106	1	150	150	100
SBK118	1	320	253	250
SBK147	1	350	350	250
SBK184	1	360	357	250
SBK214	1	385	407	250
3UI420	3	500	350	300
3UI530	3	600	450	350
3UI550	3	680	640	350
